Down , This Growth Stock Could Be Set for a Recovery in Jeremy Bowman, The Motley Fool November , min read In This Article: AMPL - Tech stocks saw a boom year in as they soared through the tail end of the pandemic. But tech stocks that went public during that year got stuck between a bull and bear market. Amplitude (NASDAQ: AMPL) is one such example. The software-as-a-service stock, which specializes in digital analytics and digital product optimization, went public in September . The stock initially soared out of the gate on the broader enthusiasm for the software sector and the company's strong growth at the time of its market debut. Start Your Mornings Smarter! Wake up with Breakfast news in your inbox every market day. Sign Up For Free » However, like the rest of the software sector, its growth rate rapidly slowed as the economy reopened and businesses focused on other priorities. The stock plunged in late and , and has remained down since then. Amplitude is now down from its peak shortly after its initial public offering, but signs are emerging of a rebound. Let's take a look at three reasons the stock could jump in . Image source: Getty Images. . Customer churn is finally under control Part of the reason for the company's struggles over the last few years is that many of its customers, like other software companies experienced, overcommitted to the platform -- and as a result, revenue growth decelerated and remained weak since . However, the company is now past most of those customers' defections, essentially clearing the deck for a growth recovery in . CEO Spenser Skates said on the earnings call: ... ARR [annual recurring revenue] and revenue reacceleration are both well within our reach. This quarter sets us firmly on that path. While we are making progress, there is still plenty of work to do. We are past the significant majority of overbought to optimization contracts, but churn is still too high. Annual recurring revenue in the quarter was up to million, slightly ahead of reported quarterly revenue, which was up to million -- a positive sign for accelerating growth. The company continues to expand its base of large customers; those with annual recurring revenue of at least were up to . Amplitude's revenue growth figure was artificially suppressed by the post-pandemic customer churn and as that disappears, its growth rate should return to double digits. As one indicator of that, its remaining performance obligations (RPO, a proxy for backlog) was up in the quarter to million, and long-term RPO (contracts greater than months) jumped to million. The company said this was the result of closer relationships with its customers and investments in the enterprise segment, meaning larger customers. . It may pry customers away from competitors Amplitude offers a suite of tools to help businesses understand how their customers are using their products so they can improve them, and considers its closest competition to be Alphabet's Google Analytics and Adobe Analytics. According to CEO Spenser Skates, Amplitude's customers are growing increasingly dissatisfied with Google Analytics, which Skates said was "creating a long tail of opportunities for Amplitude" as customers are "dissatisfied with its [Google's] persistent usability problems and unresolved privacy issues." Amplitude can grow along with the market for digital optimization, but it can also grow by taking market share from larger competitors like Google and Adobe. The company estimated its total

addressable market to be billion when it went public, and it's likely larger than that today. At its current revenue run rate, Amplitude generates less than of that in revenue, meaning the opportunity in front of it is huge if it can capitalize on it. Any challenges at Google Analytics should open the door for improved revenue growth. . The Command AI acquisition should boost growth Amplitude made its biggest acquisition to date in October, buying Command AI, a start-up that provides AI-powered user assistance. Command AI serves as a complement to Amplitude's existing analytics platform, and offers more of the features that its customers are looking for. It will allow them to add things like nudges, tours, onboarding guides, and surveys for their own users to use with their digital products. In an interview with The Motley Fool, Skates explained, "A lot of our customers have been asking for this sort of functionality for a while," and noted that the company is planning to launch a combined product early next year. Command AI is just one component of what Amplitude is doing to expand its product portfolio. The company also launched a new program called Amplitude Made Easy, which gives customers a single line of code to get up and running, and Web Experimentation, which allows users to run A/B tests in a self-serve way. Overall, Amplitude's third-quarter revenue growth of isn't going to turn investors' heads. But you can see momentum building around the corner in its RPO growth, customer churn rolling off, competitive weakness from Google, and product improvements. If revenue growth starts to accelerate, the stock could soar. Should you invest in Amplitude right now? Before you buy stock in Amplitude, consider this: The Motley Fool Stock Advisor analyst team just identified what they believe are the best stocks for investors to buy now... and Amplitude wasn't one of them. QFIN vs. AMPL: Which Stock Is the Better Value Option? Zacks Equity Research November , min read In This Article: AMPL Investors interested in stocks from the Technology Services sector have probably already heard of Qifu Technology, Inc. (QFIN) and Amplitude, Inc. (AMPL). But which of these two stocks presents investors with the better value opportunity right now? Let's take a closer look. Everyone has their own methods for finding great value opportunities, but our model includes pairing an impressive grade in the Value category of our Style Scores system with a strong Zacks Rank. The Zacks Rank is a proven strategy that targets companies with positive earnings estimate revision trends, while our Style Scores work to grade companies based on specific traits. Right now, Qifu Technology, Inc. is sporting a Zacks Rank of # (Strong Buy), while Amplitude, Inc. has a Zacks Rank of # (Hold). Investors should feel comfortable knowing that QFIN likely has seen a stronger improvement to its earnings outlook than AMPL has recently. However, value investors will care about much more than just this. Value investors also try to analyze a wide range of traditional figures and metrics to help determine whether a company is undervalued at its current share price levels. The Value category of the Style Scores system identifies undervalued companies by looking at a number of key metrics. These include the long-favored P/E ratio, P/S ratio, earnings yield, cash flow per share, and a variety of other fundamentals that help us determine a company's fair value. QFIN currently has a forward P/E ratio of , while AMPL has a forward P/E of . We also note that QFIN has a PEG ratio of . This metric is used similarly to the famous P/E ratio, but the PEG ratio also takes into account the stock's

expected earnings growth rate. AMPL currently has a PEG ratio of . Another notable valuation metric for QFIN is its P/B ratio of . Investors use the P/B ratio to look at a stock's market value versus its book value, which is defined as total assets minus total liabilities. By comparison, AMPL has a P/B of . Based on these metrics and many more, QFIN holds a Value grade of A, while AMPL has a Value grade of D. QFIN is currently sporting an improving earnings outlook, which makes it stick out in our Zacks Rank model. And, based on the above valuation metrics, we feel that QFIN is likely the superior value option right now. Want the latest recommendations from Zacks Investment Research? Q Data Analytics Earnings Review: First Prize Goes to Samsara (NYSE:IOT) Adam Hejl January , min read In This Article: IOT DOMO HCAT AMPL Q Data Analytics Earnings Review: First Prize Goes to Samsara (NYSE:IOT) As the Q earnings season comes to a close, it's time to take stock of this quarter's best and worst performers in the data analytics industry, including Samsara (NYSE:IOT) and its peers. Organizations generate a lot of data that is stored in silos, often in incompatible formats, making it slow and costly to extract actionable insights, which in turn drives demand for modern cloud-based data analysis platforms that can efficiently analyze the siloed data. The data analytics stocks we track reported a strong Q. As a group, revenues beat analysts' consensus estimates by while next quarter's revenue guidance was above. In light of this news, share prices of the companies have held steady as they are up on average since the latest earnings results. Best Q: Samsara (NYSE:IOT) One of the few public companies where Marc Andreessen is a Board member, Samsara (NYSE:IOT) provides software and hardware to track industrial equipment, assets, and fleets. Samsara reported revenues of million, up year on year. This print exceeded analysts' expectations by . Overall, it was a very strong quarter for the company with EPS guidance for next quarter exceeding analysts' expectations and an impressive beat of analysts' EBITDA estimates. "We achieved another strong quarter of durable and efficient growth at a greater scale," said Sanjit Biswas, CEO and co-founder of Samsara. Samsara Total Revenue Samsara scored the biggest analyst estimates beat and fastest revenue growth of the whole group. The company added enterprise customers paying more than annually to reach a total of . Investor expectations, however, were likely higher than Wall Street's published projections, leaving some wishing for even better results (analysts' consensus estimates are those published by big banks and advisory firms, not the investors who make buy and sell decisions). The stock is down since reporting and currently trades at . We think Samsara is a good business, but is it a buy today? Read our full report here, it's free. Health Catalyst (NASDAQ:HCAT) Founded by healthcare professionals Tom Burton and Steve Barlow in , Health Catalyst (NASDAQ:HCAT) provides data and analytics technology to healthcare organizations, enabling them to improve care and lower costs. Health Catalyst reported revenues of million, up year on year, in line with analysts' expectations. The business had a strong quarter with EBITDA guidance for next quarter exceeding analysts' expectations and full-year EBITDA guidance exceeding analysts' expectations. Health

Catalyst Total Revenue Although it had a fine quarter compared its peers, the market seems unhappy with the results as the stock is down since reporting. It currently trades at . Is now the time to buy Health Catalyst? Access our full analysis of the earnings results here, it's free. Weakest Q: Amplitude (NASDAQ:AMPL) Born out of a failed voice recognition startup by founder Spenser Skates, Amplitude (NASDAQ:AMPL) is data analytics software helping companies improve and optimize their digital products. Amplitude reported revenues of million, up year on year, exceeding analysts' expectations by . It was a satisfactory quarter as it also posted a solid beat of analysts' EBITDA estimates but a significant miss of analysts' billings estimates. Interestingly, the stock is up since the results and currently trades at . Read our full analysis of Amplitude's results here. Domo (NASDAQ:DOMO) Founded by Josh James after selling his former business Omniture to Adobe, Domo (NASDAQ:DOMO) provides business intelligence software that allows managers to access and visualize critical business metrics in real-time, using their smartphones. Domo reported revenues of million, flat year on year. This number surpassed analysts' expectations by . Overall, it was a strong quarter as it also put up EPS guidance for next quarter exceeding analysts' expectations and an impressive beat of analysts' EBITDA estimates. Domo had the slowest revenue growth among its peers. The stock is down since reporting and currently trades at . Read our full, actionable report on Domo here, it's free. Palantir (NASDAQ:PLTR) Started by Peter Thiel after seeing US defence agencies struggle in the aftermath of the terrorist attacks, Palantir (NYSE:PLTR) offers software as a service platform that helps government agencies and large enterprises use data to make better decisions. Palantir reported revenues of million, up year on year. This print topped analysts' expectations by . It was a strong quarter as it also logged an impressive beat of analysts' EBITDA estimates and revenue guidance for next quarter beating analysts' expectations. Palantir scored the highest full-year guidance raise among its peers. The stock is up since reporting and currently trades at . Read our full, actionable report on Palantir here, it's free. Market Update Thanks to the Fed's series of rate hikes in and , inflation has cooled significantly from its post-pandemic highs, drawing closer to the goal. This disinflation has occurred without severely impacting economic growth, suggesting the success of a soft landing. The stock market thrived in , spurred by recent rate cuts ( in September and each in November and December), and a notable surge followed Donald Trump's presidential election win in November, propelling indices to historic highs. Nonetheless, the outlook for remains clouded by the pace and magnitude of future rate cuts as well as potential changes in trade policy and corporate taxes once the Trump administration takes over. The path forward is marked by uncertainty. Want to invest in winners with rock-solid fundamentals? Check out our Strong Momentum Stocks and add them to your watchlist. Recent uptick might appease Amplitude, Inc. (NASDAQ:AMPL) institutional owners after losing over the past year editorial-team@simplywallst.com (Simply Wall St) January , min read In This Article: AMPL Key Insights Given the large stake in the stock by

institutions, Amplitude's stock price might be vulnerable to their trading decisions. The top shareholders own of the company. Insiders own of Amplitude. Every investor in Amplitude, Inc. (NASDAQ:AMPL) should be aware of the most powerful shareholder groups. With stake, institutions possess the maximum shares in the company. Put another way, the group faces the maximum upside potential (or downside risk). Last week's USm market cap gain would probably be appreciated by institutional investors, especially after a year of losses. In the chart below, we zoom in on the different ownership groups of Amplitude. Check out our latest analysis for Amplitude NasdaqCM:AMPL Ownership Breakdown January th What Does The Institutional Ownership Tell Us About Amplitude? Institutional investors commonly compare their own returns to the returns of a commonly followed index. So they generally do consider buying larger companies that are included in the relevant benchmark index. Amplitude already has institutions on the share registry. Indeed, they own a respectable stake in the company. This implies the analysts working for those institutions have looked at the stock and they like it. But just like anyone else, they could be wrong. It is not uncommon to see a big share price drop if two large institutional investors try to sell out of a stock at the same time. So it is worth checking the past earnings trajectory of Amplitude, (below). Of course, keep in mind that there are other factors to consider, too. NasdaqCM:AMPL Earnings and Revenue Growth January th Investors should note that institutions actually own more than half the company, so they can collectively wield significant power. Hedge funds don't have many shares in Amplitude. Looking at our data, we can see that the largest shareholder is Sequoia Capital Operations LLC with of shares outstanding. In comparison, the second and third largest shareholders hold about and of the stock. Additionally, the company's CEO Spenser Skates directly holds of the total shares outstanding. We did some more digging and found that of the top shareholders account for roughly of the register, implying that along with larger shareholders, there are a few smaller shareholders, thereby balancing out each others interests somewhat. Researching institutional ownership is a good way to gauge and filter a stock's expected performance. The same can be achieved by studying analyst sentiments. There are a reasonable number of analysts covering the stock, so it might be useful to find out their aggregate view on the future. Insider Ownership Of Amplitude The definition of company insiders can be subjective and does vary between jurisdictions. Our data reflects individual insiders, capturing board members at the very least. Management ultimately answers to the board. However, it is not uncommon for managers to be executive board members, especially if they are a founder or the CEO. Most consider insider ownership a positive because it can indicate the board is well aligned with other shareholders. However, on some occasions too much power is concentrated within this group. Our most recent data indicates that insiders own a reasonable proportion of Amplitude, Inc.. Insiders own USm worth of shares in the USb company. That's quite meaningful. It is good to see this level of investment. You can check here to see if those insiders have been buying recently. General Public Ownership With a ownership, the general public, mostly comprising of individual investors, have some degree of sway over Amplitude. While this size of ownership may not be enough to sway a policy decision in their favour, they can still make a collective impact on company policies. Private Equity Ownership Private equity firms hold a stake in Amplitude. This suggests they can be influential in key policy decisions. Some investors might be encouraged by this, since private equity are sometimes able to encourage strategies that help the market see the value in the company. Alternatively, those holders might be exiting the investment after taking it public. Next Steps: I find it very interesting to look at who exactly owns a company. But to truly gain insight, we need to consider other information, too. Like risks, for instance. Every company has them, and we've spotted warning signs for Amplitude (of which is significant!) you

should know about. But ultimately it is the future, not the past, that will determine how well the owners of this business will do. Therefore we think it advisable to take a look at this free report showing whether analysts are predicting a brighter future. NB: Figures in this article are calculated using data from the last twelve months, which refer to the -month period ending on the last date of the month the financial statement is dated. First Tap-to-Authenticate Report Released by PYMNTS Intelligence and Arculus by CompoSecure, Highlighting Top Security Concerns for Financial Institutions CompoSecure, Inc. Thu, Dec , , : PM min read In This Article: CMPO CMPOW CompoSecure, Inc. percent of financial institutions report a rise in stolen credentials as fraud cases surge, according to new survey SOMERSET, N.J., Dec. , (GLOBE NEWSWIRE) -- CompoSecure, Inc. (Nasdaq: CMPO), a leader in metal payment cards, security, and authentication solutions, released the industry's first tap-to- authenticate report in collaboration with PYMNTS Intelligence, a leading payments analyst organization. The report identified the top security challenges facing financial institutions (FIs), reporting that of financial institutions saw a rise in stolen credentials as fraud cases surge. "The PYMNTS Intelligence report underscores that the time for decisive action is now, with nearly of FIs recognizing the urgent need for improved security measures," said Adam Lowe, Chief

Product and Innovation Officer at CompoSecure. "There is growing sentiment among FIs that passwordless and physical authentication methods represent the future of financial security as credential-based fraud continues to accelerate." The report highlights that the current inconsistency in authentication methods across various transactions has proven inadequate for FIs, creating both security gaps and a poor user experience. The report survey found of FIs are prioritizing improvements to their authentication systems, with considering tap-to-authenticate metal cards. Tap-to- authenticate payment cards, such as CompoSecure's Arculus Authenticate, a multi-functional security solution on a chip-enabled card, doubles as both an authentication passkey and payment card to offer a simpler, more secure alternative to other authentication methods. According to the report, of heads of fraud believe Arculus-like devices will reduce fraud and false positives, and of heads of product see reduced friction in customer authentication. Arculus Authenticate tackles identity challenges directly: users tap their card on their phone for secure logins or transactions, eliminating the need for SMS or app-based verification. Among FIs already using metal cards, believe they would see improved customer experience and loyalty, perceive ROI potential, and anticipate higher profits and improved security by adding tap- to-authenticate technology. "The report highlights a significant challenge for financial institutions and signals that current security measures may no longer suffice in today's digital landscape," added Lowe. The PYMNTS Intelligence report used quantitative data and feedback from financial institution executives in fraud prevention, product development, and cybersecurity roles. The analysis evaluated current fraud patterns, authentication protocols, and the anticipated ROI of advanced authentication strategies. By examining these findings in-depth, the report sheds light on effective countermeasures and the potential of next-generation security tools. CompoSecure's Pioneering Security and Innovative Payment Solutions Win Two Prestigious Awards CompoSecure, Inc. September , min read In This Article: CMPO + CMPOW CompoSecure, Inc. Company honored for innovative design and cutting-edge technology, and Arculus recognized for leading security capabilities at the Global Cards & Payments Innovation Awards by The Digital Banker SOMERSET, N.J., Sept. , (GLOBE NEWSWIRE) -- CompoSecure, Inc. (Nasdaq: CMPO), a leader in metal payment cards, security, and authentication solutions, today announced its recognition at The Digital Banker's Global Cards & Payments Innovation Awards in two key categories for products that transform the global payments ecosystem through innovative design and cutting-edge technology. "Innovation and security are the core of everything we do," said Adam Lowe, Chief Innovation and Product officer for CompoSecure. "The Global Cards & Payments Innovation Awards reflect our team's commitment to delivering groundbreaking solutions that drive trust, differentiation and value for our customers in the evolving payments landscape." CompoSecure won awards for its products in the following categories: Best Security Initiative: Arculus by CompoSecure – Arculus offers a custom digital security solution to protect customer assets and authenticate users to address the rising threat of fraud and identity theft. The solution was recognized for its innovative passwordless

technology, strengthening security while reducing fraud risks and operational costs.

**Best Payments Solution by a Vendor: Echo Mirror™ Card** – The Echo Mirror™ Card stands out for its blend of sustainability, security and sleek design. Its use of recycled materials, its reflective aesthetic and its ability to enhance user engagement and loyalty earned the title of a leading innovative payment solution. The Digital Banker's Global Cards & Payments Innovation Awards celebrate companies and leaders that are reshaping the global payments landscape. These awards honor organizations shaping the future of payments through innovative solutions and leadership in modernizing payment infrastructures. The Digital Banker Awards are accolades of excellence and distinction, attributed to outstanding players and provide unbiased and objective benchmarks for the global industry.

CompoSecure Earns Global Recognition in with Awards and Finalist Honors CompoSecure, Inc. December 18, 2024, min read In This Article: CMPO CMPOW CompoSecure, Inc. Honors for leadership, innovation, and excellence in payments and security solutions SOMERSET, N.J., Dec. 18, 2024 (GLOBE NEWSWIRE) -- CompoSecure, Inc. (Nasdaq: CMPO), a leader in metal payment cards, security, and authentication solutions, was recognized with multiple prestigious awards and finalist honors during the 2024 Global Payments Awards. The company earned top distinctions across the banking, technology, manufacturing, finance, legal, and payment innovation sectors, highlighting its commitment to industry leadership on a global scale. "While awards are a great measure of success, the real achievement is how they spotlight innovation and excellence in everything we do," said Jon Wilk, CEO of CompoSecure. "We are proud of the creativity and commitment within our organization, and of course, the trust of our partners who inspire us to reach new heights." CompoSecure earned nine awards in and was a finalist in eleven categories across industry-leading award programs in the U.S. and Europe. The winning recognitions include: The International Card Manufacturers Association (ICMA) Élan Awards: CompoSecure won in three categories including "Best Metal" category for the BMW i Precision Card, "Environmentally-Friendly" category for the Rogers Bank metal credit card, and the "Best Secure Payment Card" category for the IndusInd Bank Avios Visa Infinite Credit Card. The Digital Banker's Global Cards & Payments Innovation Awards: CompoSecure secured wins in three categories, including Payment Professional of the Year for CEO Jon Wilk, Best Security Initiative for Arculus, and Best Payments Solution by a Vendor for CompoSecure's Echo Mirror™ Card. The NJBIZ Awards: CompoSecure Chief Financial Officer Tim Fitzsimmons won a Leaders in Finance award, and General Counsel Steve Feder won a Leaders in Law award. Banking Tech Awards USA: Jon Wilk won recognition in the Tech Leadership category as a Visionary CEO. CompoSecure Announces Plan to Spin-Off Resolute Holdings Management, Inc. to Form a Differentiated Alternative Asset Management Platform and Accelerate Value Enhancing Acquisitions for CompoSecure

CompoSecure, Inc. December , min read

In This Article: CMPO CMPOW CompoSecure, Inc. CompoSecure to enter into a Management Agreement with Resolute Holdings Pro rata distribution of shares in Resolute Holdings to all existing shareholders of CompoSecure Spin-off designed to accelerate value enhancing acquisitions for CompoSecure David Cote will be Executive Chairman and Tom Knott will be CEO of Resolute Holdings Transaction is expected to be taxable for both CompoSecure and all existing shareholders Resolute Holdings expected to have limited profitability in FY SOMERSET, N.J., Dec. , (GLOBE NEWSWIRE) -- CompoSecure, Inc. (Nasdaq: CMPO), a leader in metal payment cards, security, and authentication solutions, today announced its intention to spin-off a newly formed subsidiary called Resolute Holdings Management, Inc. ("Resolute Holdings"). The investment team at CompoSecure, and their associated costs, will move to Resolute Holdings upon completion of the spin-off. As part of the spin-off transaction, a wholly owned subsidiary of CompoSecure, CompoSecure Holdings, L.L.C., will enter into a Management Agreement with Resolute Holdings under which CompoSecure Holdings, L.L.C. will pay Resolute Holdings a quarterly management fee in cash equal to of CompoSecure's Latest Twelve Months' Adjusted EBITDA. Resolute Holdings will be responsible for providing CompoSecure's business with certain services, including providing oversight of its capital allocation strategy, operational practices, as well as M&A sourcing and execution. The acquisition strategy will focus on bolt-on targets adjacent to CompoSecure's current operating business as well as larger targets that diversify the current business and customer mix. CompoSecure's existing management team, led by President and CEO Jon Wilk, will continue to operate the day-to-day business and deliver for our customers around the world while leveraging the CompoSecure Operating System to drive revenue growth and profitability. The spin-off of Resolute Holdings will be on a pro rata basis to all existing shareholders of CompoSecure, meaning each existing shareholder will receive an allocation of shares in Resolute Holdings proportional to their current ownership in CompoSecure. The distribution of shares in Resolute Holdings will give rise to a taxable gain to CompoSecure and will be treated as a taxable dividend to all existing shareholders for U.S. federal and applicable state and local tax purposes. Resolute Holdings anticipates limited profitability in fiscal year as it establishes operations and builds out infrastructure, including adding to its investment and operating team. These investments are designed to facilitate the acceleration of organic and value enhancing inorganic growth at CompoSecure. Resolute Holdings will be led by David Cote as Executive Chairman of the Board of Directors and Tom Knott as Chief Executive Officer. In addition to David Cote and Tom Knott, the Board of Directors will include John Cote, Joseph DeAngelo, Roger Fradin, Paul Galant, Brian Hughes, Mark James, Krishna Mikkilineni, and Jane Thompson. Resolute Holdings is expected to trade under the ticker "RHLD" on Nasdaq following completion of the spin-off. Goldman Sachs & Co. LLC is serving as financial advisor to CompoSecure, and Paul, Weiss, Rifkind, Wharton & Garrison LLP is serving as legal advisor. The spin-off is subject to customary conditions, including the effectiveness of Form registration with the Securities and Exchange Commission and final approval by CompoSecure's Board of Directors. The spin-off is currently expected to be completed during the first quarter of . ) For purposes of the management fee, Adjusted EBITDA, as further defined in the Management Agreement, represents CompoSecure's historical Adjusted EBITDA methodology, less stock-based compensation expense. About CompoSecure

Founded in , CompoSecure (Nasdaq: CMPO) is a technology partner to market leaders, fintech's and consumers enabling trust for millions of people around the globe. The company combines elegance, simplicity and security to deliver exceptional experiences and peace of mind in the physical and digital world. CompoSecure Continues to Strengthen Board of Directors with the Appointment of Dr. Krishna Mikkilineni CompoSecure, Inc. October , min read In This Article: CMPO CMPOW CompoSecure, Inc. SOMERSET, N.J., Oct. , (GLOBE NEWSWIRE) -- CompoSecure, Inc. (Nasdaq: CMPO), a leader in metal payment cards, security, and authentication solutions, is pleased to announce the appointment of Dr. Krishna Mikkilineni to its Board of Directors ("Board"), effective today. Dr. Mikkilineni brings a wealth of experience in operations and technology, along with a proven ability to deliver success for leading global organizations such as Honeywell. "With the addition of Dr. Mikkilineni we continue to strengthen our world-class Board of Directors," said Jon Wilk, President and CEO of CompoSecure. "His exceptional business acumen and extensive global expertise will enhance our ability to drive growth, accelerate operational excellence, and expand our international opportunities." Dr. Mikkilineni currently serves as General Partner of a deep tech venture fund and a startup accelerator, roles he has held since , and in which he has been instrumental in funding and growing technology-driven startup companies. Prior to May , Dr. Mikkilineni served in various roles of increasing seniority at Honeywell International, Inc. for over years, including as global Chief Technology Officer, a role he held for nine years, and as global Integrated Supply Chain Officer and Chief Information Officer, roles he held for six years. Prior to that, Dr. Mikkilineni established Honeywell's engineering operation in India eventually growing the global engineering force to over with half focused on software. Dr. Mikkilineni received his Ph.D. in electrical and computer engineering from the University of Florida. "We are thrilled to welcome Krishna to our Board of Directors," said David Cote, Executive Chairman of the CompoSecure Board of Directors. "His experience leading high-performing organizations will be a great asset as we seek to unlock CompoSecure's potential in an effort to drive both short-term and long-term value for shareholders." "I am honored to join CompoSecure's Board of Directors at such an exciting time," said Dr. Krishna Mikkilineni. "I look forward to collaborating with the other Board members and the management team to help CompoSecure further strengthen its position as a market leader and enable this business to grow in high impact areas leveraging my background." Dr. Mikkilineni replaces Niloo Razi Howe who recently resigned from the Board due to personal reasons. CompoSecure expresses its sincere appreciation to Niloo for her dedicated service and invaluable contributions to the company. Institutional investors control of Weave Communications, Inc. (NYSE:WEAV) and were rewarded last week after stock increased editorial-team@simplywallst.com (Simply Wall St) December , min read In This Article: WEAV - Key Insights Institutions' substantial holdings in Weave Communications implies that they have significant influence over the company's share price of the business is held by the top shareholders Insiders have sold recently A look at the shareholders of Weave Communications, Inc. (NYSE:WEAV) can tell us which group is most powerful. The group holding the most number of shares in the company, around to be precise, is institutions. In other words, the group stands to gain the most (or lose the most) from their investment into the company. And things are looking up for institutional investors after the company gained USm in market cap last week. One-year return to shareholders is currently and last week's gain was the icing on the cake. Let's take a closer look to see what the different types of shareholders can tell us about Weave Communications. See our latest analysis for Weave Communications NYSE:WEAV Ownership Breakdown December th What Does The Institutional Ownership Tell Us About Weave Communications? Institutional investors commonly compare their own returns to the returns of a commonly followed index. So they generally do consider buying larger companies that are included in the relevant benchmark index. Weave Communications already has institutions on the share registry. Indeed, they own a respectable stake in the company. This can indicate that the company has a certain degree of credibility in the investment community. However, it is best to be wary of relying on the supposed validation that comes with institutional investors. They too, get it wrong sometimes. It is not uncommon to see a big share price drop if two large institutional investors try to sell out of a stock at the same time. So it is worth checking the past earnings trajectory of Weave Communications, (below). Of course, keep in mind that there are other factors to consider, too. NYSE:WEAV Earnings and Revenue Growth December th We note that hedge funds don't have a meaningful investment in Weave Communications. The company's largest shareholder is CrossLink Capital, Inc., with ownership of . Deer Management Company, LLC is the second largest shareholder owning of common stock, and Pelion, Inc holds about of the company stock. In addition, we found that Brett White, the CEO has of the shares allocated to their name. A closer look at our ownership figures suggests that the top shareholders have a combined ownership of implying that no single shareholder has a majority. Researching institutional ownership is a good way to gauge and filter a stock's expected performance. The same can be achieved by studying analyst sentiments. Quite a few analysts cover the stock, so you could look into forecast growth quite easily. Insider Ownership Of Weave Communications The definition of company insiders can be subjective and does vary between jurisdictions. Our data reflects individual insiders, capturing board members at the very least. Management ultimately answers to the board. However, it is not uncommon for managers to be

executive board members, especially if they are a founder or the CEO. Insider ownership is positive when it signals leadership are thinking like the true owners of the company. However, high insider ownership can also give immense power to a small group within the company. This can be negative in some circumstances. We can see that insiders own shares in Weave Communications, Inc.. This is a big company, so it is good to see this level of alignment. Insiders own US\$ worth of shares (at current prices). If you would like to explore the question of insider alignment, you can click here to see if insiders have been buying or selling.

**General Public Ownership** The general public-- including retail investors -- own stake in the company, and hence can't easily be ignored. While this group can't necessarily call the shots, it can certainly have a real influence on how the company is run.

**Private Equity Ownership** Private equity firms hold a stake in Weave Communications. This suggests they can be influential in key policy decisions. Some investors might be encouraged by this, since private equity are sometimes able to encourage strategies that help the market see the value in the company. Alternatively, those holders might be exiting the investment after taking it public.

**Next Steps:** I find it very interesting to look at who exactly owns a company. But to truly gain insight, we need to consider other information, too. Backblaze (BLZE) Stock Jumps : Will It Continue to Soar? Zacks Equity Research Mon, February , at : PM GMT+ min read In This Article: BLZE WEAV - Backblaze, Inc. BLZE shares ended the last trading session higher at . The jump came on an impressive volume with a higher-than-average number of shares changing hands in the session. This compares to the stock's loss over the past four weeks. Backblaze is benefiting from a strong go-to-market transformation led by new executives, which includes upskilling, focused partnerships, and sales plays, driving significant revenue growth, particularly in its B Cloud Storage segment, while also improving cost efficiency through aggressive expense management and restructuring. This company is expected to post quarterly loss of per share in its upcoming report, which represents a year-over-year change of +. Revenues are expected to be million, up from the year-ago quarter. While earnings and revenue growth expectations are important in evaluating the potential strength in a stock, empirical research shows a strong correlation between trends in earnings estimate revisions and near-term stock price movements. For Backblaze, the consensus EPS estimate for the quarter has remained unchanged over the last days. And a stock's price usually doesn't keep moving higher in the absence of any trend in earnings estimate revisions. So, make sure to keep an eye on BLZE going forward to see if this recent jump can turn into more strength down the road. The stock currently carries a Zacks Rank # (Hold). You can see the complete list of today's Zacks Rank # (Strong Buy) stocks here >>>> Backblaze is a member of the Zacks Internet - Software industry. One other stock in the same industry, Weave Communications, Inc. WEAV, finished the last trading session higher at . WEAV has returned over the past month. For Weave Communications , the consensus EPS estimate for the upcoming report has remained unchanged over the past month at . This represents a change of + from what the company reported a year ago. Weave Communications currently has a Zacks Rank of # (Hold). Want the latest recommendations from Zacks Investment Research? Today, you can download Best Stocks for the Next Days. Click to get

Wall Street Analysts Predict a Upside in Weave Communications (WEAV): Here's What You Should Know Zacks Equity Research November , min read In This Article: WEAV - Shares of Weave Communications, Inc. (WEAV) have gained over the past four weeks to close the last

trading session at , but there could still be a solid upside left in the stock if short-term price targets of Wall Street analysts are any indication. Going by the price targets, the mean estimate of indicates a potential upside of . The average comprises seven short-term price targets ranging from a low of to a high of , with a standard deviation of . While the lowest estimate indicates a decline of from the current price level, the most optimistic estimate points to a upside. More than the range, one should note the standard deviation here, as it helps understand the variability of the estimates. The smaller the standard deviation, the greater the agreement among analysts. While the consensus price target is a much-coveted metric for investors, solely banking on this metric to make an investment decision may not be wise at all. That's because the ability and unbiasedness of analysts in setting price targets have long been questionable. But, for WEAV, an impressive average price target is not the only indicator of a potential upside. Strong agreement among analysts about the company's ability to report better earnings than they predicted earlier strengthens this view. While a positive trend in earnings estimate revisions doesn't gauge how much a stock could gain, it has proven to be powerful in predicting an upside. Here's What You Should Know About Analysts' Price Targets According to researchers at several universities across the globe, a price target is one of many pieces of information about a stock that misleads investors far more often than it guides. In fact, empirical research shows that price targets set by several analysts, irrespective of the extent of agreement, rarely indicate where the price of a stock could actually be heading. While Wall Street analysts have deep knowledge of a company's fundamentals and the sensitivity of its business to economic and industry issues, many of them tend to set overly optimistic price targets. Are you wondering why? They usually do that to drum up interest in shares of companies that their firms either have existing business relationships with or are looking to be associated with. In other words, business incentives of firms covering a stock often result in inflated price targets set by analysts. However, a tight clustering of price targets, which is represented by a low standard deviation, indicates that analysts have a high degree of agreement about the direction and magnitude of a stock's price movement. While that doesn't necessarily mean the stock will hit the average price target, it could be a good starting point for further research aimed at identifying the potential fundamental driving forces. That said, while investors should not entirely ignore price targets, making an investment decision solely based on them could lead to disappointing ROI. So, price targets should always be treated with a high degree of skepticism. Why WEAV Could Witness a Solid Upside Analysts' growing optimism over the company's earnings prospects, as indicated by strong agreement among them in revising EPS estimates higher, could be a legitimate reason to expect an upside in the stock. That's because empirical research shows a strong correlation between trends in earnings estimate revisions and near-term stock price movements. The Zacks Consensus Estimate for the current year has increased over the past month, as four estimates have gone higher compared to no negative revision. Moreover, WEAV currently has a Zacks Rank # (Strong Buy), which means it is in the top of more than the stocks that we rank based on four factors related to earnings estimates. Given an impressive externally-audited track record, this is a more conclusive indication of the stock's potential upside in the near term. You can see the complete list of today's Zacks Rank # (Strong Buy) stocks [here >>>>](#) Therefore, while the consensus price target may not be a reliable indicator of how much WEAV could gain, the direction of price movement it implies does appear to be a good guide. Weave Now Integrates With Prompt Business Wire Tue, Feb , , : PM min read In This Article: WEAV - New integration streamlines physical therapy practice management and elevates patient engagement. LEHI, Utah, February , --(BUSINESS WIRE)--Weave (NYSE: WEAV), a leading all-in-one customer experience and payments software platform for small and medium-sized healthcare businesses, today announced an integration with Prompt, the leading software platform for rehab therapy practices. The Weave and Prompt integration provides physical therapy practices with a powerful toolset designed to streamline operations, reduce administrative burdens, and enhance patient experiences. This integration delivers additional value to Weave and Prompt customers with: Seamless Patient Communication VoIP Phone System with Call Pop – Identify patients when they call, with instant access to key patient details from Prompt like upcoming appointment information and overdue balances for a personalized conversation. Two-Way Texting – Engage with patients through text messaging, improving appointment no-show rates, responsiveness and adherence to treatment plans. Missed-Call Texts – Automatically send follow-up texts to patients who call but don't leave a message, ensuring no lost opportunities. Include Prompt's online scheduling link to ensure visits get booked even while offices are closed. Effortless Scheduling & Engagement Appointment Reminders – Reduce no-shows with automated reminders via text, keeping schedules full and patients on track. Data Sync with Prompt – Eliminate manual data entry with automatic syncing of contacts and schedules from Prompt to Weave. Simplified Billing & Payments Text-to-Pay & Online Payments – Offer patients a seamless way to pay their bills, reducing billing cycles and improving cash flow. Automated Payment Reminders – Allows practices to continue to collect more outstanding balances, but now with less effort by enabling practices to turn each Weave payment invoice or Text to Pay request into a "set-it-and-forget-it" collection campaign. Physical therapy practices often face operational inefficiencies due to disconnected communication systems, leading to delayed payments, high no-show rates, and administrative burdens. Traditional patient outreach methods, such as phone calls and emails, are time-consuming and often ineffective. The Weave and Prompt integration solves these challenges by offering a unified solution that automates and streamlines key practice functions, ultimately improving patient engagement, reducing administrative workload, and boosting revenue. Increased Patient Engagement – Advanced communication tools facilitate better relationships and adherence to treatment plans. Reduced Administrative Work – Automation frees up staff time, allowing more focus on patient care. Improved Cash Flow – Streamlined billing and payments to minimize unpaid invoices. Scalability – A flexible and robust system that grows with the practice. Enhanced Patient Experience – Improved communication and appointment tracking results in higher patient satisfaction and retention rates. Weave Selected as an Overall SaaS Award Winner for the APPEALIE SaaS and Software Awards Business Wire February , min read In This Article: WEAV - LEHI, Utah, February , --(BUSINESS WIRE)--Weave (NYSE: WEAV), a leading all-in-one customer experience and payments software platform for small and medium-sized healthcare businesses, was selected as an overall winner in Analytics and Business Intelligence, Customer Service and ERP, and Finance for Small Business and Mid-Market companies at the APPEALIE SaaS and Software awards. The APPEALIE awards are awarded to SaaS applications that demonstrate outstanding customer satisfaction and success. Overall, SaaS Award winners were selected using Net Promoter Scores™ (NPS), UI/UX, recent product improvements, and third-party analyst research, among other criteria. A total of SaaS apps were recognized for their demonstrated excellence and customer outcomes. As an indicator of APPEALIE's SaaS Award selectivity, the Overall SaaS Award winners averaged over stars on the most popular software review platforms (G, Capterra, and GetApp - all of which use a -star rating scale). Weave optimizes operations and helps healthcare practices grow through better patient communication and engagement. Weave integrates billing and payment requests into a practice's communication workflows—helping to shorten payment timelines, reduce accounts receivable and write-offs, and drive overall growth and profitability. "Customer satisfaction is our driving force at Weave," said Brett White, CEO of Weave. "Being one of apps to be selected as an overall winner with the APPEALIE Awards is truly an honor. Our teams work hard to provide solutions that address the needs of our customers and their patients and clients. We are committed to putting our customers first by developing innovative solutions for healthcare practices, and recognition for this award proves we are on the right track." Weave recently launched a fully redesigned experience with a modern, intuitive interface, and powerful AI tools. Weave includes an AI-powered Assistant integrated into the platform, which helps customers craft personalized responses to reviews, write professional branded emails, and automate tasks like message tagging and voicemail transcriptions. With Weave Call Intelligence, healthcare providers can easily extract actionable insights from call data through automated call categorization and revenue opportunity identification. This innovative AI-powered product provides a comprehensive understanding of patient and client interactions, empowering practice owners and office managers to make data-driven decisions that can drive practice growth. Weave enables healthcare practices to automate tasks, improve data accuracy, streamline payment workflows, and provide seamless care to patients. Weave's recognition in the APPEALIE awards follows multiple awards for workplace excellence, business performance, and employee satisfaction. These include ranking first in categories in the G Winter Report, being named a Great Place to Work list in the U.S. and India, ranking in the top best places to work in Utah, being featured on Inc.'s Annual List of Best Workplaces for as well as being named an Inc. Power Partner Award Winner. For more information on how Weave helps healthcare providers grow their practices, visit <https://www.getweave.com> About Weave Weave is the leading all-in-one customer experience and payments software platform for small and medium-sized healthcare businesses. From the first phone call to the final invoice and every touchpoint in between, Weave connects the entire patient journey. Weave's software solutions transform how healthcare practices attract, communicate with, and engage patients and clients to grow their business. Weave seamlessly integrates billing and payment requests into communication workflows, streamlining payment timelines, reducing accounts receivable, and supporting practice profitability. In the past year, Weave has been named an Inc. Power Partner, a G leader in Patient Relationship Management software, and a Top Product for Small Business. To learn more, visit

VNET Group Inc (VNET) Q Earnings Call Highlights: Strong Revenue Growth and Strategic ... GuruFocus News Fri, Nov , , : PM min read In This Article: VNET + Net Revenue: Increased by year-over-year to CNY billion. Adjusted EBITDA: Grew by year-over-year to CNY million. Wholesale IDC Revenue: Increased by year-over-year to CNY million. Wholesale Capacity in Service: Reached megawatts, up by megawatts year-over-year. Utilization Rate: Wholesale business utilization rate rose to , with mature business at . Net Profit: Recorded at CNY million, a significant improvement from a net loss of CNY million in the same period last year. Sales and Marketing, R&D, and G&A Expenses: Decreased by year-over-year to CNY million. Net Operating Cash Inflow: CNY billion for the first nine months of . Cash and Short-term Investments: Totaled CNY billion. CapEx: CNY billion for the first nine months of , with CNY billion for wholesale business expansion. Full Year Revenue Guidance: Expected to be in the range of CNY billion to CNY billion. Full Year Adjusted EBITDA Guidance: Expected to be in the range of CNY billion to CNY billion. Warning! GuruFocus has detected Warning Signs with VNET. Release Date: November , For the complete transcript of the earnings call, please refer to the full earnings call transcript. Positive Points VNET Group Inc (NASDAQ:VNET) reported a year-over-year increase in net revenues to CNY billion, driven by the growth of its wholesale IDC business. Adjusted EBITDA increased by year over year to CNY million, reflecting effective cost and resource allocation optimization. The wholesale business segment saw a significant revenue increase of year over year, reaching CNY million, due to rising demand. VNET Group Inc (NASDAQ:VNET) secured six new orders totaling megawatts, indicating strong customer demand and market position. The company maintained a strong cash position and unused credit line, supporting current operations and future development plans. Negative Points Despite strong growth, the utilization rate for the wholesale business, although improved, still stands at , indicating room for further optimization. The retail IDC business showed stable capacity and utilization rates, suggesting limited growth in this segment compared to wholesale. VNET Group Inc (NASDAQ:VNET) faces risks and uncertainties related to forward-looking statements, which could impact future performance. The company's CapEx is expected to reach the high end of guidance at CNY billion, indicating significant capital expenditure requirements. The pre-REITs project for the Taicang campus is still in the ramping up stage with a current utilization rate of around , which may affect immediate returns. JOYY (YY) Surges : Is This an Indication of Further Gains? Zacks Equity Research November , min read In This Article: VNET + JOYY YY shares ended the last trading session higher at . The jump came on an impressive volume with a higher-than-average number of shares changing hands in the session. This compares to the stock's loss over the past four weeks. JOYY is benefiting from its extensive global user base and solid portfolio of interactive platforms such as Bigo Live, Likee, and Hago. With a focus on innovation and expansion into global commerce SaaS, JOYY is well-poised to drive future growth. This social media company is expected to post quarterly earnings of per share in its upcoming report, which represents a year-over-year change of -. Revenues are expected to be million, down from the year-ago quarter. Earnings and revenue growth expectations certainly give a good sense of the potential strength in a stock, but empirical research shows that trends in earnings estimate revisions are strongly correlated with near-term stock price movements. For JOYY, the consensus EPS estimate for the quarter has remained unchanged over the last days. And a stock's price usually doesn't keep moving higher in the absence of any trend in earnings estimate revisions. So, make sure to keep an eye on YY going forward to see if this recent jump can turn into more strength down the road. The stock currently carries a Zacks Rank # (Hold). You can see the complete list of today's Zacks Rank # (Strong Buy) stocks here >>>> JOYY belongs to the Zacks Internet - Services industry. Another stock from the same industry, Vianet VNET, closed the last trading session lower at . Over the past month, VNET has returned . For Vianet , the consensus EPS estimate for the upcoming report has changed + over the past month to . This represents a change of + from what the company reported a year ago. Vianet (VNET) Moves to Strong Buy: Rationale Behind the Upgrade Zacks Equity Research January , min read In This Article: VNET + Vianet (VNET) could be a solid addition to your portfolio given its recent upgrade to a Zacks Rank # (Strong Buy). An upward trend in earnings estimates -- one of the most powerful forces impacting stock prices -- has triggered this rating change. The Zacks rating relies solely on a company's changing earnings picture. It tracks EPS estimates for the current and following years from the sell-side analysts covering the stock through a consensus measure -- the Zacks Consensus Estimate. Since a changing earnings picture is a powerful factor influencing near-term stock price movements, the Zacks rating system is very useful for individual investors. They may find it difficult to make decisions based on rating upgrades by Wall Street analysts, as these are mostly driven by subjective factors that are hard to see and measure in real time. As such, the Zacks rating upgrade for Vianet is essentially a positive comment on its earnings outlook that could have a favorable impact on its stock price.

**Most Powerful Force Impacting Stock Prices** The change in a company's future earnings potential, as reflected in earnings estimate revisions, and the near-term price movement of its stock are proven to be strongly correlated. The influence of institutional investors has a partial contribution to this relationship, as these big professionals use earnings and earnings estimates to calculate the fair value of a company's shares. An increase or decrease in earnings estimates in their valuation models simply results in higher or lower fair value for a stock, and institutional investors typically buy or sell it. Their bulk investment action then leads to price movement for the stock. For Vianet, rising earnings estimates and the consequent rating upgrade fundamentally mean an improvement in the company's underlying business. And investors' appreciation of this improving business trend should push the stock higher.

**Harnessing the Power of Earnings Estimate Revisions** As empirical research shows a strong correlation between trends in earnings estimate revisions and near-term stock movements, tracking such revisions for making an investment decision could be truly rewarding. Here is where the tried-and-tested Zacks Rank stock-rating system plays an important role, as it effectively harnesses the power of earnings estimate revisions. The Zacks Rank stock-rating system, which uses four factors related to earnings estimates to classify stocks into five groups, ranging from Zacks Rank # (Strong Buy) to Zacks Rank # (Strong Sell), has an impressive externally-audited track record, with Zacks Rank # stocks generating an average annual return of + since . You can see the complete list of today's Zacks # Rank (Strong Buy) stocks here >>>>.

**Earnings Estimate Revisions for Vianet** For the fiscal year ending December , this provider of carrier-neutral internet data center services is expected to earn - per share, which is a change of from the year-ago reported number. Analysts have been steadily raising their estimates for Vianet. Over the past three months, the Zacks Consensus Estimate for the company has increased .

**Bottom Line** Unlike the overly optimistic Wall Street analysts whose rating systems tend to be weighted toward favorable recommendations, the Zacks rating system maintains an equal proportion of 'buy' and 'sell' ratings for its entire universe of more than stocks

at any point in time. Irrespective of market conditions, only the top of the Zacks-covered stocks get a 'Strong Buy' rating and the next get a 'Buy' rating. So, the placement of a stock in the top of the Zacks-covered stocks indicates its superior earnings estimate revision feature, making it a solid candidate for producing market-beating returns in the near term. You can learn more about the Zacks Rank here >>> The upgrade of Vianet to a Zacks Rank # positions it in the top of the Zacks-covered stocks in terms of estimate revisions, implying that the stock might move higher in the near term. x, Inc. (EGHT) Reports Surge in AI-Powered CX Adoption, Enhances Contact Center Solutions Affan Mir Wed, Feb , , : AM min read In This Article: EGHT + We recently compiled a list of the AI News and Ratings You Should Take a Look At. In this article, we are going to take a look at where x, Inc. (NASDAQ:EGHT) stands against the other AI stocks. AI Accessibility and Global Growth In a CNBC interview, Clement Delangue, CEO of Hugging Face, discussed some important developments in the AI industry and focused on OpenAI, DeepSeek, and the role of open-source innovation. He noted the increasing global attention on AI and the discussions surrounding major industry shifts but emphasized that his priority remains on actual AI development rather than business transactions. He welcomed efforts to make OpenAI more open-source-oriented and stated that greater contributions to open science could have a significant global impact. Delangue talked about the rapid rise of DeepSeek, whose open-source model has gained widespread adoption, with over a thousand variants developed and millions of downloads on Hugging Face. He pointed out that DeepSeek's model has already surpassed Llama and Mistral in popularity and is on track to become the most widely used model on the platform. Unlike proprietary AI services that cater to API users, DeepSeek primarily attracts AI builders who run and customize models independently. He suggested this segment could eventually outgrow the user base of API-driven AI platforms. Delangue also affirmed that DeepSeek's reported million training cost and lower inference expenses appear accurate. He praised its detailed research paper and the transparency enabled by open-source releases, which allow others to replicate its results. Hugging Face is working on its own replication effort, OpenR, to provide further transparency on training data and methodologies, making it accessible to developers with limited budgets. Moreover, Delangue acknowledged DeepSeek's ability to train models using less advanced, legally compliant chips but left open the possibility that it had access to more sophisticated hardware. He noted, however, that AI advancements in training efficiency could reduce reliance on high-end chips, promoting broader accessibility in the field. Finally, Delangue observed that DeepSeek's success has inspired greater ambition in many countries, including Europe, where governments are increasing AI investments. He sees a growing consensus on the benefits of open-source AI. He also noted that China's AI progress, while surprising to some, was predictable due to its increasing contributions to open-source AI and research. He suggested that other countries, including India, could follow a similar approach to accelerate their AI capabilities and compete at the highest levels. EGHT or FIVN: Which Is the Better Value Stock Right Now? Zacks Equity Research Wed, February , at : PM GMT+ min read In This Article: EGHT + FIVN Investors interested in Internet - Software stocks are likely familiar with x (EGHT) and Five (FIVN). But which of these two stocks offers value investors a better bang for their buck right now? We'll need to take a closer look. We have found that the best way to discover great value opportunities is to pair a strong Zacks Rank with a great grade in the Value category of our Style Scores system. The proven Zacks Rank emphasizes companies with positive estimate revision trends, and our Style Scores highlight stocks with specific traits. x has a Zacks Rank of # (Buy), while Five has a Zacks Rank of # (Hold) right now. Investors should feel comfortable knowing that EGHT likely has seen a stronger improvement to its earnings outlook than FIVN has recently. But this is just one factor that value investors are interested in. Value investors are also interested in a number of tried-and-true valuation metrics that help show when a company is undervalued at its current share price levels. The Style Score Value grade factors in a variety of key fundamental metrics, including the popular P/E ratio, P/S ratio, earnings yield, cash flow per share, and a number of other key stats that are commonly used by value investors. EGHT currently has a forward P/E ratio of , while FIVN has a forward P/E of . We also note that EGHT has a PEG ratio of . This popular figure is similar to the widely-used P/E ratio, but the PEG ratio also considers a company's expected EPS growth rate. FIVN currently has a PEG ratio of . Another notable valuation metric for EGHT is

its P/B ratio of . The P/B ratio is used to compare a stock's market value with its book value, which is defined as total assets minus total liabilities. For comparison, FIVN has a P/B of . These are just a few of the metrics contributing to EGHT's Value grade of B and FIVN's Value grade of D. EGHT sticks out from FIVN in both our Zacks Rank and Style Scores models, so value investors will likely feel that EGHT is the better option right now. Want the latest recommendations from Zacks Investment Research? Today, you can download Best Stocks for the Next Days. Strong Customer Adoption and Usage of AI-powered Solutions Powering x CX Transformation  
Strong Customer Adoption and Usage of AI-powered Solutions Powering x CX Transformation  
· Business Wire Business Wire Tue, Feb , : PM min read In This Article: EGHT + x  
Platform for CX AI-based Products Increased Year-Over-Year As Organizations Turn to AI  
Solutions to Unlock Continuous Business Improvements and Accelerate Resolutions  
CAMPBELL, Calif., February , --(BUSINESS WIRE)--x, Inc. (NASDAQ: EGHT), the industry's  
most integrated Platform for CX that combines Contact Center, Unified Communication, and  
CPaaS APIs, today announced strong customer adoption and usage of the AI-powered x  
Platform for CX is helping to drive the next phase of the company's CX transformation.  
AI-based customer experience solutions, led by organizations increasingly adopting x  
Intelligent Customer Assistant to provide customer self-service, grew year-over-year as  
of the third quarter of fiscal year ended December , . "Organizations are increasingly  
recognizing that long-term growth hinges on repeat customers, and the key to earning  
that loyalty is exceptional customer satisfaction. Businesses that prioritize seamless  
operations and outstanding service aren't just meeting expectations—they're creating the  
conditions for customers to return, advocate, and drive sustainable success," said  
Samuel Wilson, Chief Executive Officer at x, Inc. "The x Platform for CX is proving  
essential for organizations as they embrace AI to simplify complexity and fuel  
sustainable growth—empowering CX and IT leaders to transform fragmented interactions  
into seamless, impactful experiences that exceed customer expectations." More  
organizations are adopting the AI-powered x Platform for CX to enhance their customers'  
journey across every touchpoint. Highlights as of December , , the end of x's FY Q,  
included: AI-based customer experience solutions grew year-over-year, and was led by the  
strong adoption of x Intelligent Customer Assistant for digital and voice self-service,  
which increased nearly year-over-year and over quarter-over-quarter. The volume of x  
Intelligent Customer Assistant AI interactions grew more than year-over-year and  
quarter-over-quarter. More customers deploying the x Intelligent Customer Assistant for  
Voice solution attributed to a jump in Voice AI interactions quarter-over-quarter and  
represented more than of all AI interactions in FY Q. Highlighted x customer wins in FY  
Q included: The Australian financial services subsidiary of a global automobile  
manufacturer chose x Contact Center and x Work with Quality Management, Speech Analytics  
and Workforce Management to support nearly employees, including contact center agents.  
The decision to move from a legacy on-premises system to the x cloud platform was due to  
x's intuitive and logical solution, modern user interface and comprehensive AI-powered

reporting and analytics to provide the company with flexibility for future needs. After the successful deployment of x Work across stores and over employees, one of the largest specialty retailers in North America added x Contact Center with Workforce Management to support more than contact center agents. Key factors in the migration to x Platform for CX were omnichannel capabilities, robust analytics and deep integration with workforce management tools to deliver flexibility, real-time insights, and improved agent productivity. A leading business travel management provider in the UK selected x Contact Center and x Work to support more than contact center agents. With two subsidiaries already using x, the company chose the x Platform for CX for its high quality service and the uptime SLA for exceptional reliability and minimized downtimes. A Canadian insurance and benefits consulting provider with over employees and branches across Canada, chose x Contact Center and x Work with x Engage and Quality Management & Speech Analytics to support CX across the organization. The company wanted to move to a single cloud platform that offers a high quality of service, flexibility and potential upgrade capabilities together with French language support to meet compliance requirements. A global flooring solutions manufacturer with employees and over locations serving customers in over countries selected x Contact Center and x Work to migrate from a legacy on-premises system to a unified cloud platform that will support over employees and contact center agents.
